

# DCP PROFESSIONAL SHOWCASE SERIES 2026

DCP is delighted to present a series of talks by local clinical psychologists, showcasing their unique skillset, expertise, and experiences across a diverse range of settings. Whether you are a seasoned professional or just starting out, we hope to inform and inspire how clinical psychology may contribute to society at large.

All talks will be presented in Cantonese, and will be conducted in hybrid mode via Zoom and face-to-face at our HKPS workspace (Unit 1211, The Metropolis Tower, Hung Hom, Kowloon, Hong Kong).

## Price per talk:

DCP members: \$100

HKPS members: \$280

Non-members: \$380

## **UNDERSTANDING PARAPHILIA AND HELPING PEOPLE TROUBLED BY THEIR PARAPHILIA**

**認識各種性癖好及如何幫助患性癖好的人**

Dr. Ephraem Tsui

Paraphilia generally refers to the wide range of unusual sexual interests. Commonly known paraphilia includes Fetishism, Voyeurism, Exhibitionism, Frotteurism, Pedophilia, SM. However, there are many other unusual sexual interests that are beyond our imagination. Dr Tsui will share his scientific knowledge on paraphilia and clinical approaches of helping people troubled by paraphilia. It should be a seriously interesting and eye-opening introduction to the topic.

## **ACCEPTANCE COMMITMENT THERAPY (ACT) FOR COUPLES**

**伴侶接納與承諾療法**

Dr. Puihan Joyce Chao

**APR  
21**

This talk examines the therapeutic stance and process-based techniques in Acceptance and Commitment Therapy (ACT) for couple and relationship difficulties, using a case example to demonstrate the six core ACT processes and mechanisms of change in couple work. It will also situate ACT for couples within the broader couple therapy field by outlining some key convergences and divergences with other major couple therapy models.

15**

## **FORENSIC INTERVIEW FOR CHILDREN**

**兒童法證會面**

Mr. Michael Fung

Children can be reliable witnesses, yet adult assumptions and inappropriate questioning often compromise the quality of their evidence. This training explores the challenges children face in forensic interviews and introduces Hong Kong's advanced multidisciplinary approach, which aims to obtain accurate evidence while protecting children from unnecessary stress and harm.
